

SHORT COURSE ON QUANTITATIVE HEALTH RESEARCH METHODS AND BIOSTATISTICS

Organized by the Public Health Foundation of India and the University of Leicester under the NIHR Global Health Research Centre for Multiple Long-Term Conditions

FACULTY

Dr Siddhartha Mandal

Senior Research Scientist, Centre for Chronic Disease Control, New Delhi

Dr Dimple Kondal

Senior Research Scientist (Biostatistician), Centre for Chronic Disease Control, New Delhi

Prof Shifalika Goenka

Professor, Public Health Foundation of India, New Delhi

Prof Sailesh Mohan

Professor, Public Health Foundation of India and Director, Centre for Chronic Conditions and Injuries, New Delhi

Prof Dorairaj Prabhakaran

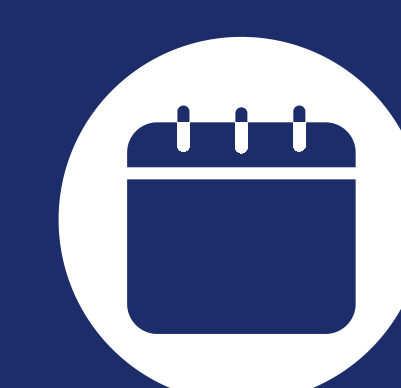

Distinguished Professor, Public Health Foundation of India and Executive Director, Centre for Chronic Disease Control, New Delhi

COURSE OUTLINE

- Quantitative research methods
- Statistical inference and hypothesis testing
- Generalized linear models
- Analysis of repeated measures and time-to-event data
- Research ethics

OBJECTIVE

To familiarize participants with advanced statistical techniques that are used in public health research and use R to apply them for data analysis

May 6-9, 2024

9:30 AM to 4:30 PM

In-person at
Four Points by
Sheraton New Delhi,
Airport Highway

ELIGIBILITY

Individuals who are pursuing or have completed their doctoral or post-doctoral training in public health or related disciplines and who want to enhance their knowledge of quantitative health research methods and skills in data analysis.

PRE-REQUISITES

- Knowledge of basic epidemiology & biostatistics along with working knowledge of any statistical software.
- Participants will be sent instructions to install R statistical software on their personal laptops which they have to bring for conducting data analysis during the course.

Dataset for analysis will be provided.
